Raw reads and the amplicons found in them (24 barcodes, 196,537 raw reads)

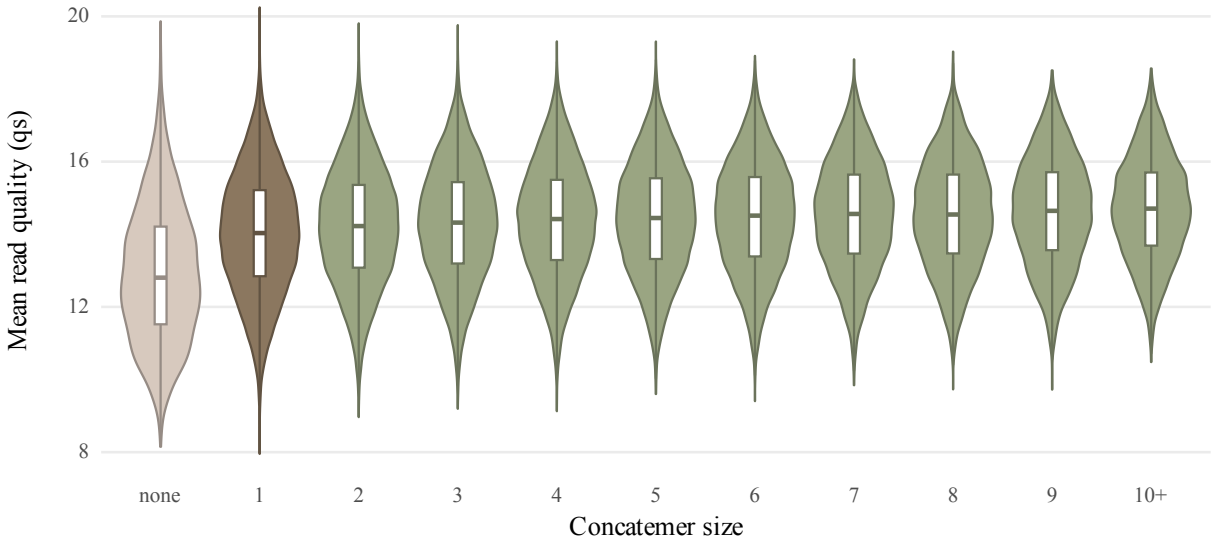

A Raw read length by concatemer size

none = no amplicon found; one amplicon adds about 116 bases

B Mean read quality by concatemer size

Mean Phred quality of the whole raw read (QS from the basecaller)

C Unexplained sequence next to the amplicons

Main normal read end peak (adapter + barcode)
Smaller peak 116 bases to the right is one whole amplicon not found,
in concatemer 8.3%, singleton 15.9%
