Big dataset: throughput (reads processed per second)
* v1's higher throughput reflects doing less per read, not a faster algorithm - see total-time chart
Reads / second
4000
2000
0
947 reads/sec
47 reads/sec
130 reads/sec
93 reads/sec
4859 reads/sec
First naive function (v1)
(no QPhred scores)*
QPhred aware
function (v2)
Restructured v2 +
parallel (3 cores)
Direction-aware
2x pairwiseAlignment (7 cores)
Final: anchors +
position & strand checks
